

# Bosnian Pine

Watering Needs: Needs regular watering - weekly, or more often in extreme heat.

Plant type: [Conifer](#)

Deciduous/evergreen: [Evergreen](#)

Climate zone: 4-8

Growth habit: Pyramidal

Growth rate: Slow

Average landscape size: Slow grower to 40 ft. tall, 10 ft. wide, larger with age.

Special features: [Bird Friendly](#), [Easy Care](#), [Showy Fruit](#), [Waterwise](#), [Year-round Interest](#)

Foliage color: [Green](#)

Blooms: Conifer; prized for foliage.

**Design Ideas:** This columnar pine is a great low-maintenance evergreen for suburban homesites or parks. Very useful to separate multistory homes on very narrow lots. Plant densely for a noise-absorbing, wind-cutting wall of green. To appreciate its natural beauty, plant as a single specimen or in groves of three to five.

**Companion Plants:** Grow Bosnian Pine as a vertical background of evergreen foliage to highlight more spectacular trees in the foreground. Try Eastern Redbud, (*Cercis canadensis*), Radiant Crabapple, (*Malus x 'Radiant'*) or Red Buckeye, (*Aesculus pavia*). May also stand nicely with columnar Lombardy Poplar, (*Populus nigra 'Italica'*) or Cologreen Juniper, (*Juniperus scopulorum 'Cologreen'*)
